sportSAFE

At Sportsafe we recognise that it is vital to keep your equipment in safe working condition. Through intensive use and wear and tear sporting equipment becomes worn and possibly unsafe. For this reason we now deliver a comprehensive **5-step maintenance check** through our **sportSAFE** programme.

Sportsafe provides a safety service inspection on all brands of sporting equipment by our qualified evaluator. You will receive a 'Safety and Maintenance Report' to help meet Health and Safety requirements.

There are two types of sports equipment - permanently installed and relocatable. To ensure a safe environment, irrespective of the amount of use, sporting equipment must be checked each year. These checks form the basis of an **Annual Sportsafe Inspection**.

sportSAFE 5-step Maintenance Programme

How to begin your 5-step Maintenance Programme

Sportsafe Inspection

An initial audit and inspection provides you with a comprehensive checklist of all your equipment, safety, maintenance required and any minor 'on-the-spot' adjustments needed.

We advise the 'Sportsafe Inspection' is on an annual basis, however a request for equipment repair or an additional safety check can happen at any time. All installed and relocatable equipment is physically checked including all wall and roof fixing points. The condition of all equipment is recorded along with any safety and maintenance recommendations.

A comprehensive report is compiled which includes costs for any equipment requiring repair. This allows you to tailor the maintenance to suit your budgets.

These annual inspections and reports can become part of your Health and Safety monitoring procedure and over time become a record of your commitment in this area.

Call **(09) 273 8067** to discuss how **sportSAFE** can help keep you ahead of the game in equipment maintenance.
